ABSTRACT

This guide is a comprehensive listing of institutions that honor or grant credit or placement through the College Board's Advanced Placement Program (AP) or College-Level Examination Program (CLEP). Included also are colleges' policies regarding the use of the Test of Standard Written English (TSWE) and the Achievement Tests for placement purposes only. The policy information reported here was received from 1,541 colleges in response to a questionnaire mailed to each eligible institution in January, 1978. The categories under which information is given are: (1) Advanced Placement Program; (2) College-Level Examination Program; (3) Admissions Testing Program (Test of Standard Written English and Achievement Tests); (4) sophomore standing; (5) transfer students; (6) maximum credit by examination; (7) additional information; and (8) office handling correspondence. Colleges were asked to distinguish between their use of these examination for placement and for credit, and to note whether the placement or credit was offered routinely or only under additional circumstances, such as a favorable review by an academic department. The guide was developed to give college applicants, counselors, college administrators, and test developers a representative opinion with respect to educational standards. Indexes are provided. The College Entrance Examination Board is a nonprofit membership organization that provides tests and other educational services for students, schools, and colleges. The membership is composed of more than 2,000 colleges, schools, school systems, and education associations. Representatives of the members serve on the Board of Trustees and advisory councils and committees that consider the College Board's programs and participate in the determination of its policies and activities.

Foreword

This guide to the practices of colleges and universities in awarding credit or placement or both to entering students on the basis of College Board examinations is designed to serve the interests of several different categories of readers. First in mind are persons planning to enter college who are interested in the placement or credit they might expect to receive as a result of taking examinations. Every effort has been made to make the guide as useful as possible to these readers, whether they are students still in high school or older adults whose education has been interrupted. For this reason, *College Placement and Credit by Examination: 1978 Guide to Institutional Policies* is expected to find a useful place in the offices of college counselors and educational brokers. Also anticipated as users of the guide are officials and faculty members of colleges and universities engaged in reviewing their placement and credit policies or in establishing policies for the first time. For them this guide affords an opportunity to examine the policies of other institutions. Finally in mind as readers are the wide range of other people for whom the use of standardized examinations in placing and awarding college credit to students represents, in its own right, an interesting and significant development in American education.

A follow-up edition to *College Placement and Credit by Examination, 1975*, this guide differs from its predecessor in several respects, including size and format. As in the case of the earlier edition, the information reported here about institutional policies is based on responses by the institutions to questionnaires mailed to them by the College Board. However, included for the first time in this edition is information about the use by some institutions of Achievement Tests and the Test of Standard Written English of the Admissions Testing Program for placement purposes, as well as information about the use made for both credit and placement of examinations offered through the Advanced Placement Program and the College-Level Examination Program. Colleges were also asked for the first time to distinguish between their use of these examination for placement and their use for credit. In reporting grades or scores used in making placement and credit decisions, colleges were further asked to note whether the placement or credit was offered routinely or offered only under certain additional circumstances, such as a favorable review by an academic department.

Other new features that are expected to be of particular interest to college and school administrators and faculty members are three appendixes that provide data summarizing some of the information provided by institutions for their policy descriptions.

An important purpose for reporting in this edition more detailed information about college policies was to answer better the questions that college applicants and their counselors often raise. However, we could not expect to capture in a single publication a full and detailed description of the placement and credit practices of every college and university. The forms these practices take are too varied and too complex in some instances for that end to be achieved. Readers with special interest in the policies and practices of particular institutions are strongly advised to obtain additional information by addressing inquiries to the offices identified in this guide. Readers also need to understand that college placement and credit policies are subject to change from one year to the next. The institutional statements of policies in this guide cannot be regarded as binding the colleges in any contractual sense.

In 1977 the College Board published *Guidelines on the Uses of College Board Test Scores and Related Data* to describe how the College Board interprets its own responsibilities in relation to the public and its clientele of test users, what additional responsibilities it believes the users of these services have, and what conditions are appropriate for the several uses of the College Board tests. Regarding the use of tests for placement and credit purposes, the *Guidelines* recommend that colleges:

"1. Develop their practices, policies, and procedures in the light of the performance levels and ranges of enrolled students.

"2. Require faculty members who may be responsible in the particular subject-matter areas covered by the tests to review the examination to be used for appropriateness.

"3. Develop and publicize a clearly stated policy, readily available to prospective and enrolled students, on granting credit-by-examination.

"4. Indicate what tests are available for granting credit-by-examination, how students may gain access to them, the score levels at which credit is granted, and the number of credits awarded in relation to such tests and score levels.

"5. Establish levels of performance on examinations for which credit is granted that are not significantly higher or lower for those seeking credit than for those who do successful work in the relevant courses.

"6. Make no tuition charge to students for credits granted by examination.

"7. Endeavor to grant credit for knowledge and skills at a specified level of competence in subjects recognized for credit, regardless of how the individual's knowledge or skill may have been attained.

"8. Ensure that students exempted or given credit-by-examination are placed in the most appropriate next course, if a sequential course is available and chosen by the student.

"9. Accept the transfer of credits-by-examination when score levels meet the normal standards of the receiving institutions."

For the College Board, *College Placement and Credit by Examination: 1978 Guide to Institutional Policies* represents an effort to accomplish two separate purposes set forth in its charter. As a voluntary educational membership organization of collegiate institutions, secondary schools, and educational associations, the Board is directed on one hand "to provide for the continuance and development of a program of tests and examinations," and on the other hand "to further the development of representative opinion with respect to educational standards." This guide aids in achieving the former purpose by helping inform test users and others affected by its examinations about some of the ways in which the examinations are used. The guide contributes to the latter purpose of the Board by facilitating the development of representative opinion. Although the role of the College Board is not to prescribe the standards of any college that decides to use its examinations, the information assembled in this guide may be of special assistance to colleges in various ways as they go about the setting of their own standards. In a modest way, the guide may also serve to help achieve among colleges a greater degree of consensus about some of the considerations involved in using examinations for placement and credit and in setting standards for their use.

College Board tests used for placement and credit

Advanced Placement Program

The Advanced Placement Program (AP) is a cooperative educational endeavor of the College Board. It is based on the fact that many young people can, with profit and delight, complete college-level studies in their secondary schools, and it represents a desire of schools and colleges to foster such experiences. Like other programs of the Board, this program is national, its policies are determined by representatives of member institutions, and its operational services are provided by Educational Testing Service.

Advanced Placement serves three groups: students who wish to pursue college-level studies while still in secondary school; schools that want to offer these students the opportunity to do so; and colleges that wish to encourage and recognize such achievement. It does this by providing practical descriptions of college-level courses to interested schools and by providing the results of examinations based on these courses to the colleges of the students' choice. Participating colleges, in turn, grant credit and appropriate placement, or one of these, to students who have done well on the examinations. Thus the Advanced Placement Program is an instrument of cooperation that extends the educational opportunities available to students by effectively relating college-level courses at thousands of schools to appropriate credit and placement at the colleges that the students eventually attend.

The course descriptions. At present, course descriptions, examinations, and other materials are available in American history, art (history, studio), biology, chemistry, Classics (Vergil, Latin lyric), English composition and literature, European history, French level 3 (language, literature), German level 3 (literature), mathematics (calculus AB, calculus BC), music (listening and literature, theory), physics (physics B, physics C), and Spanish level 3 (language, literature).

Present plans call for the addition of three other subjects in 1979–1980, English language and composition, German language, and art drawing. Except for the two separable parts of AP Classics and of Physics C, each course description and examination is considered to cover a full-year college-level course at a designated level and, thus, to identify students ready to be placed at least one full year ahead in their AP fields. The nature of their advanced preparation is specified in each course description.

In every subject the course description and the examination are the special responsibility of a development committee made up of secondary school and college teachers appointed by the College Board to overlapping terms. Such committees function as subcommittees of the Board's academic advisory committees, each of which is responsible for all College Board tests and examinations in a subject. The course descriptions, reviewed annually and published every spring, are regularly distributed to participating schools and colleges and are available to others on request. Although the course descriptions are designed primarily for teachers, department heads, and curricular coordinators, they can also serve as useful guides for students who wish to prepare for the examinations through independent study. In most subjects, the course descriptions are supplemented by booklets on *Beginning an Advanced Placement Course* and *Grading the Advanced Placement Examination.*

The examinations. The Advanced Placement Examinations—or, in the case of studio art, Evaluations—are offered throughout the world in the middle week of May. All the examinations contain either an essay or problem-solving section; most of them also contain a section consisting of objective questions. (Each examination is described more fully in its course description.) No examination is longer than three hours; some are quite short. (Again, the course descriptions are explicit on this point.) Their current cost (1979) is $32 each, with fee reductions available in cases of acute financial need.

The examinations are administered at and by participating schools or multischool centers. Any school is free to participate; it need only appoint an Advanced Placement coordinator and file the AP Participation Form sent to all secondary school principals each fall. Similarly, students in any grade are free to take these examinations; they need only register, in time, with their AP coordinators. The program regularly has successful candidates from each of the last three grades of secondary school.

The reading. In June the examinations, as well as the portfolios in studio art, are graded by several hundred college and secondary school teachers familiar with the program, brought together especially for this purpose and serving under the direction of a chief reader in each field. Precautions are taken to ensure the fairness and reliability of the reading. The chief readers—college professors who sit with the development committees and later direct the reading—develop initial grading standards in consultation with their immediate assistants. The other readers then join in the determination of more detailed expectations. Throughout the reading, measures such as the assignment of each examination book to several readers, the deliberate obscuring of previous readers' grades as well as of the students' names and schools, and the continuous monitoring of readers' work by table leaders are intended to keep the readers' judgments as reliable as possible. The questions on the objective sections are scored by machine, with a correction factor incorporated to compensate for random guessing.

The grades. The chief readers bring to the grading process the same standards as are applied in developing the examinations. The objective questions are used both to provide high reliability (the likelihood that a candidate repeating the examination would receive the same grade) and to provide links with former years, in order that a candidate who earns a grade of 3 on one year's examination be at the same level of competence in the subject as candidates who earned grades of 3 in other years.

The stability of grades in a program that deliberately publishes its essay questions, and hence must use new ones every year, is maintained in two ways. First, in subjects where enough objective questions are used, it is possible to make direct comparisons between the performance of the current year's candidates and that of a previous year's candidates on a set of identical questions. Other psychometric techniques make it possible to use these data to calibrate the objective sections of the two examinations with reasonable accuracy. Thus, the effects on candidates' grades of different essay questions from one year to the next can be minimized, but the success of this procedure depends on maintaining the security of the objective questions. Second, the chief readers compare the general distributions of grades in their subjects to those of the last few years and consider other pertinent data to arrive at decisions on grades.

In this way the readers' judgments on the essay questions are combined with the results of the objective questions; and the total raw scores are converted by the chief readers to the AP Program's five-point scale: 5 for extremely well qualified; 4 for well qualified; 3 for qualified; 2 for possibly qualified; and 1 for no recommendation.

In early July the grades are reported to the students, their secondary schools, and the colleges they are entering. Tenth and eleventh graders, and other students not entering college directly, have the college copies of their grades held for later use. Students' essay booklets are available, at cost, to their designated colleges. Those not requested by students' colleges are similarly available to their schools.

College-Level Examination Program

The College-Level Examination Program (CLEP) is a nationwide credit-by-examination program that offers people of all ages and all backgrounds an opportunity to obtain recognition for college-level achievement. That opportunity is available regardless of where, when, or how the knowledge has been acquired: through formal study; independent reading; employment experiences; noncredit courses; adult classes; television, radio, or cassette courses, business, industrial, or military training; or advanced work in regular high school classes. Any person entering college, presently attending college, or already out of college, may take CLEP examinations and seek credit by submitting the test results to a college for evaluation. CLEP tests are administered during the third week of each month at more than 900 test centers located on college and university campuses throughout the country.

More and more colleges and universities have accepted the principle that college-level learning, however acquired, should be credited toward a degree, and they have sought various ways of validating such college-level achievement. Many use CLEP, which has found wide acceptance as an instrument for granting placement and credit. Moreover, CLEP results can be used to meet requirements for degrees awarded without residential study by a number of institutions and state agencies.

CLEP also can help individuals who need to demonstrate that they possess the equivalent of college learning in order to apply for certain positions in business, industry, or government or to meet licensing requirements for teaching, library, or other professional positions.

CLEP offers two types of tests—General Examinations and Subject Examinations. Each examination is developed by a committee of college faculty working with test specialists at Educational Testing Service. The committee is responsible for preparing test specifications, developing and selecting test questions, reviewing the statistical properties of the test, and preparing the description of the test for the potential test takers. All CLEP examinations are normed by administering them to students who have taken specified college courses or met distributional requirements.

CLEP General Examinations. The General Examinations measure college-level achievement in five basic areas of the liberal arts: English Composition, Humanities, Mathematics, Natural Sciences, and Social Sciences and History. They test material usually covered in the first two years of college and often referred to as the general or liberal education requirement. Although colleges and universities may use various approaches in providing a liberal education, they expect their students to be familiar with common elements or areas of subject matter. The General Examinations sample these common areas.

Each of the General Examinations is a 90-minute objective test. In addition, the examination in English Composition offers another format of a 45-minute objective section and a 45-minute essay section that is centrally scored. There are special administrations on designated dates for the English Composition with Essay. All General Examination scores are reported on a scale of 200-800.

CLEP Subject Examinations. The Subject Examinations measure achievement in specific college courses and serve to grant exemption from and credit for these courses. The examinations stress concepts, principles, relationships, and applications of course material and are not based on a particular syllabus. The tests are constructed to differentiate among several levels of mastery and so contain questions of varying difficulty.

Most of the 47 Subject Examinations are 90-minute objective tests. Many include a separate optional 90-minute essay section that candidates should take if the credit-granting institution requires it. The essay section is sent directly to the institution designated by the candidate for grading by the faculty of that institution. The scores on the Subject Examinations are reported on a scale of 20 to 80.

Admissions Testing Program

The Admissions Testing Program (ATP) consists of the Scholastic Aptitude Test (SAT), its permanent adjunct, the Test of Standard Written English (TSWE), and the Achievement Tests in fifteen subjects from the college-preparatory curriculum. The tests are administered at established test centers in the United States and abroad on six dates each academic year.

The Test of Standard Written English is intended for course placement. It is a test of the conventions of English that students encounter in textbooks and in writing papers and compositions. This test does not distinguish among students whose command of English is superior. The English Composition Test (an Achievement Test), similar to the Test of Standard Written English but longer, is intended to distinguish among students whose command of English is superior.

The Scholastic Aptitude Test consists of two sections, verbal and mathematical. Although the SAT is most often used as a guide to making admissions decisions, some institutions use the verbal and mathematical scores as an aid in placement, counseling, and advising.

The Achievement Tests are suitable for both admissions and for placement decisions. Candidates may sit for one, two, or three of these hour-long tests. Most sit for three, one of which is usually the English Composition Test, with the remainder selected from among those a college may require or in a subject in which a candidate considers his preparation to be strong.

Introduction: Using this guide

College Placement and Credit by Examination: 1978 Guide to Institutional Policies is a comprehensive listing of institutions that honor or grant credit or placement through the College Board's Advanced Placement Program (AP) or College-Level Examination Program (CLEP). Included also are colleges' policies regarding the use of the Test of Standard Written English (TSWE) and the Achievement Tests for placement purposes only. The policy information reported here was received from 1,541 colleges in response to a questionnaire mailed to each eligible institution in January 1978.

The college descriptions are grouped according to state. Within each state section, all colleges are listed alphabetically by their official names, including in many cases branches of complex institutions and units of state systems. The index in the back of the book lists all the responding institutions alphabetically by name. The sequence of categories under which information is given is (1) Advanced Placement Program, (2) College-Level Examination Program, (3) Admissions Testing Program (Test of Standard Written English and Achievement Tests), (4) Sophomore Standing, (5) Transfer Students, (6) Maximum Credit by Examination, (7) Additional Information, and (8) Correspondence.

Colleges were asked to provide the minimum scores or grades they use in granting placement or credit according to the following categories for each of the various examinations. The categories of credit and placement and the abbreviations used are:

P–Routine placement or exemption: The institution routinely offers some form of placement or exemption to virtually all students with the grade or score shown.

Pq–Placement or exemption with some possible qualifications: The institution normally offers some form of placement or exemption on the basis of the grade or score listed, but with some possible qualifications, such as departmental review, exception of students in certain programs, use of test results in conjunction with other predictors, etc.

C–Routine credit: The institution routinely offers credit to virtually all students with the grade or score shown.

Cq–Credit with some possible qualifications: The institution normally grants credit on the basis of the grade or score listed, with some possible qualifications, such as departmental review, exception of students in certain programs, use of test results in conjunction with other predictors, etc.

E–Essay required: The essay section of the examination (certain CLEP General and Subject Examinations only) must be taken in conjunction with the rest of the test. The essays are ungraded and so performance on this portion of an examination is evaluated only by the institution.

The actual amount of credit each institution grants is not reported in this publication and varies according to the grade or score a student receives, higher grades often yielding more credit.

Some institutions do not have specific policies regarding credit and placement by examination but welcome the concept and so have made brief general statements without providing minimum scores or grades. A few other institutions have very specific requirements that could not be fully described within our system of categorizing policy. Explanatory statements that elaborate on minimum score and grade information or that are presented in lieu of minimum scores or grades appear under Additional Information.

In using the information found under specific headings in this book, the following considerations should be kept in mind.

(1) Policies toward specific examinations are under continual departmental and administrative review at most institutions. As a result, students with examination grades or scores not currently acceptable to a particular institution according to the information reported here should consult the institution to determine whether the policy has changed. Because the AP grades and CLEP scores reported are the lowest that the institutions *normally* accept as evidence of college-level performance, a student may find some institutions willing to consider lower scores on an individual basis.

(2) Colleges that indicate either placement or credit only for a specific examination may in fact have a policy

covering both. Since the granting of credit does not automatically mean that a student is exempted from required course work, *credit by examination may not satisfy degree requirements*. It is the student's responsibility to determine whether credit by examination meets graduation requirements and, if placing out of course work, to request that credit be posted on his or her academic record.

(3) Institutional procedures regarding granting or honoring of routine credit or placement (C or P) may vary. Some institutions have specific qualifications such as student's age, choice of major, successful completion of course work in residence prior to posting of credit, and state education requirements.

(4) Most institutions disallow credit or placement by examination if any prior course work was attempted in a given subject. With few exceptions, *duplication of examination and course work credit is not permitted*.

(5) Because an institution does not list a specific examination does not preclude a student's receiving consideration regarding placement or credit. The institution may have no articulated policy simply because it may never have made use of the examination. The student is advised to consult with the institution for further information in such cases.

Advanced Placement Program

Colleges were asked to report their policies regarding the AP Examinations listed below. These examinations are graded on the following scale of 1 to 5:

5—Extremely well qualified
4—Well qualified
3—Qualified
2—Possibly qualified
1—No recommendation

Specific examinations are listed followed by the minimum grade required for placement (P), qualified placement (Pq), credit (C), or qualified credit (Cq). For example: Biology 4C, European History 4Cq.

College-Level Examination Program

Colleges were asked to report their policies regarding the CLEP Examinations listed on the next page. The CLEP General Examinations are scored on a scale ranging from 200 (low) to 800 (high). Scores for the General Examination sub-tests and CLEP Subject Examinations are reported on a scale ranging from 20 (low) to 80 (high).

The scores listed after each specific examination represent the minimum required for placement (P), qualified placement (Pq), credit (C), or qualified credit (Cq).

Where an essay is required (signified by E), the department concerned generally reviews the actual examination booklet for the essay section, and a qualified score on an examination may be invalidated by a poor essay.

Some institutions indicate under Additional Information that they use subscores in evaluating student performance on certain CLEP General and Subject Examinations. In some cases colleges reporting minimum subscores use them alone; others use them in conjunction with the overall score for a given examination.

For each of the CLEP Subject Examinations in Dental Auxiliary Education (Dental Materials; Head, Neck, and Oral Anatomy; Oral Radiography; and Tooth Morphology and Function) the score required by a single institution for placement or credit may depend on the student's program of study. Where colleges have reported different score requirements, for example, for dental assistants, hygienists, and laboratory technicians, these requirements appear under Additional Information.

For each of the CLEP Subject Examinations in French, German, and Spanish, there are two possible levels of achievement—Levels 1 and 2. Colleges may report scores by levels, in which case the credit or placement awarded approximates two (Level 1) or four (Level 2) semesters of college course work or its local equivalent. Where only one score is reported for both levels, students are advised to contact the institution to determine the credit or placement available.

Most institutions use their own standards for establishing cutoff scores for individual CLEP General and Subject Examinations. Some institutions have adopted the recommended minimum scores of the Commission on Educational Credit of the American Council on Education (the average score in each examination of students in the national norming sample who earned a grade of C in a comparable college-level course). Some institutions use the 50th percentile as a cutoff. Both these sets of scores appear with the list of CLEP examinations below.

Admissions Testing Program

Test of Standard Written English. The Test of Standard Written English is scored on a scale ranging from 20 (low) to 60+ (high). The score is used to identify students for placement in remedial or developmental courses in English. Students scoring above the listed minimum usually qualify for an institution's *regular* freshman English course.

Achievement Tests. Reported on a scale ranging from 200 (low) to 800 (high), these tests, listed below, may be a basis for recognizing a student's fulfillment of course requirements or prerequisites to advanced courses in a sequence. The scores listed are minimum requirements, for placement (P) or qualified placement (Pq). Where scores are not avaliable, a "P" alone following a test title indicates that placement is possible on an individual basis.

Sophomore Standing

Many institutions have policies allowing a student to qualify on entrance for sophomore standing by means of AP or CLEP or both. Sophomore standing or its local equivalent may be achieved by earning a specified number of credits or through various combinations of examinations that satisfy freshman course requirements, enabling a student to enroll in higher-level courses or advanced sequences and to accelerate the education process.

The number of credits or examinations required to achieve sophomore standing are listed for institutions that report they have such a policy. Because acceleration through sophomore standing on entrance is usually individualized, students interested in this program should contact the college for additional information.

Transfer Students

Institutional policies regarding transfer of credit based on AP or CLEP from one institution to another generally fall into one of two categories: (1) routine acceptance of credit granted by the previous institution and (2) reevaluation of test scores on the basis of the institution's own standards.

Colleges routinely accepting transfer credit may still reevaluate the *amount* of credit transferable. Qualifications may also be applied, such as successful completion of subsequent course work, applicability of credit toward degree requirements, posting of credit with scores on previous institution's transcript, and departmental review. Students transferring credit from one college to another should contact the new institution for detailed procedural information.

A college reevaluating scores considers itself the institution granting credit and generally requires the official score report from Educational Testing Service. Some institutions also review the examination booklet. Where essays are requested for first-time students, they are usually required for transfer students.

Transfer of credit may be possible on an individual basis. Students seeking credit for examinations other than those indicated as honored by a specific institution should contact that institution.

Maximum Credit by Examination

Institutions indicating "no maximum," or those reporting no policy, usually do not automatically accept all credits earned by examination toward fulfillment of degree requirements. Institutions may have a no-maximum policy for certain examinations or programs while limiting credit through others. Curriculum requirements and degrees sought can affect maximum credit by examination. Although not always indicated, most institutions have residency requirements that also affect maximum credit by examination.

Additional Information

This heading includes relevant information that could not be accommodated under the other general headings. Information is reported here for colleges that indicate they currently grant placement or credit by examination on an individual basis and for colleges that report they use subscores.

Correspondence

For more information about institutional policies, the title of the person to whom correspondence should be addressed is provided for each institution.
